## EVALUATION OF STUDENTS:

**ATTENDANCE:** You are expected to be in class and to be on time! While in class, I expect your **undivided attention** to the subject matter and to my scintillating lectures. I want you to feel free to ask questions about physics and know that I am not going to try and ridicule or embarrass you. I expect you to show the same respect to your classmates as you would wish others to show you. Enough said.

**GRADING:** Your grade will be determined by using the following:

Exam I	22.5%
Exam II	22.5%
Exam III	22.5%
Final Exam	22.5%
Assignment One	2.5%
Assignment Two	2.5%
Assignment Three	2.5%
Assignment Four	2.5%

I will provide an equation sheet for each exam. Using any other materials during the exam, including your cell phone, will result in an F. Doing the homework problems is the most important thing you can do to succeed in this class. Having said that, I will assume that you have done the homework and give you a score of one hundred for the assignments component of your grade. There will be **no make-up exams except under the most dire of circumstances! I expect to be notified when you can not make it for an exam! You can leave messages on my voicemail.** Your final grade for this course will **not** be posted nor will I give it to you over the phone. You may, however, always feel free to discuss your grades with me **in person**.

**GRADING SCALE:**

90-100	A
80-89	B
70-79	C
60-69	D
59-0	F
